Environmental Policy

Homeline Building Products Limited is the UK's leading independent Trade Home Improvement Stockist; whose warehouse network stretches across the country. The company recognises the actual and potential impacts that its operations, activities and products may have on the local and global environment, and the need to keep these activities under constant control and review.

The General Manager of Homeline Building Products Limited has primary responsibility for environmental matters on site. In addition, the company have appointed a Group Health, Safety & Environmental Manager with responsibility for managing environmental matters on an on-going basis

Homeline Building Products Limited commits to the following:

- Comply with the requirements of all relevant environmental legislation and other identified obligations of its interested parties
- Implement, operate, and maintain an Environmental Management System certified to the ISO14001 standard
- Strive to continually improve its environmental performance and standards of pollution prevention to all media to protect the environment
- Set environmental objectives and targets in key areas and keep such targets under regular review
- Continue to develop processes to ensure the efficient use of resources and raw materials, and to reduce wastes
- Seek to improve its efficiency in the use of energy and water
- Provide adequate and on-going environmental training for staff throughout the organisation
- Report regularly on its environmental performance.

This Environmental Policy shall be communicated to all levels within the organisation, published on our website and be made available to suppliers, customers and interested parties on request. The Policy shall be reviewed at regular intervals by senior management.
