Gloss White Porcelain White Jade Granite Peacock Dolphin Grey Enchanted Bluebird Siren Candy Floss Sugar Plum Black Ice

## Colour matched trims available

2 Part Divider (Top and Base)

Internal Corner 18mm

J Trim

External Corner

## Food Safety Compliant

All our PVC cladding materials conform to all the latest regulations intended for food contact.

## Fixing

Sheets can be fixed to the majority of dry substrates dependant on surface suitability. Using the adhesives in association with our range of profiles is all that is required to provide a complete hygienic installation.

## Cutting

PVC products are easily cut, the most suitable method is to use a jigsaw with a fine toothed blade. If you are using a circular saw, use a fine TCT blade.

## Cleaning

Using a soft cloth and diluted mild detergent is normally all that is required. Do not clean using any solution with a temperature exceeding 60°C. Do not use any abrasive cleaners, pads or wire wool as this will damage the surface.

## Chemical Resistance

Resistant to virtually all commonly used chemicals, for further details please contact our sales team.

## Fire Resistance

PVC is a self-extinguishing fire retardant material. Our cladding materials are tested to meet the BS 476 part 6 and Class 1 at BS 476 part 7.

# Applications

PVC cladding is ideal for applications including commercial kitchens, food preparation areas, clean rooms, toilets, changing rooms and all areas that require a sealed wall cladding solution.

**Hospitals**
