Industry's 1<sup>st</sup> recycled roofline from

# Industry's 1st Recycled Roofline from Homeline

Leading roofline manufacturer Homeline is proud to announce the successful development of Core, a new range of environmentally friendly BBA Approved recycled Fascias and Soffits (an industry 1st) which meets and exceeds the most stringent recycling criteria for sustainable developments.

**“Core not only looks the same once installed, it's easy to fit, fully guaranteed and carries full BBA certification.”**

So, whether you're a Housing Association, House Builder or Specifier, using Core will demonstrate you are committed to using top quality recycled materials on your development, from one of the most forward thinking and environmentally friendly roofline manufacturers.

## About Core.

The name is Core is derived from the process that Homeline uses to make the recycled roofline range. The inner core of the product is produced using recycled PVC-U, but importantly the outer skin (the bit you see) uses virgin PVC-U which encapsulates the core to provide a perfect finish.

**“It's that clever you wouldn't know its recycled once installed.”**

Core is not only designed to give customers a competitive advantage, it also helps Homeline as a business reduce its impact on the environment by reducing carbon footprints and reducing landfill waste of PVC.

# Environmental Benefits

Core recycled rooflines deliver 'greater value' to companies working towards the 'Code for Sustainable Homes'. Please ask our representative for more details of how this could benefit your business.

# Accreditations & Guarantee

- BBA Accredited.
- ISO:9001 & ISO:14001 Accredited.
- Lead & Tin Free formulation.
- 15 Year Guarantee.

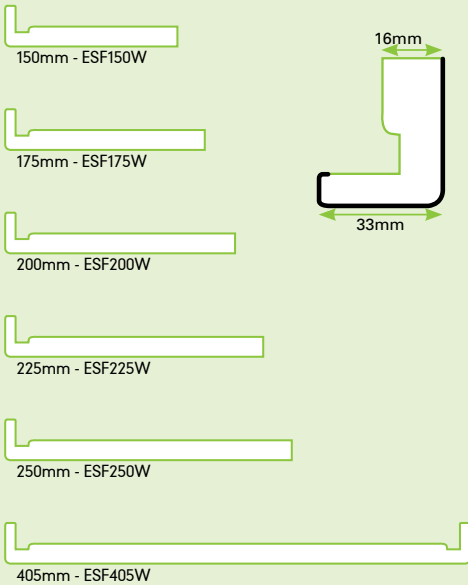

## 16mm Square Fascia
