White 909G	Avocado 613	Green 611	Lime 610	Blue 521	Grey 712
----------------------	-----------------------	---------------------	--------------------	--------------------	--------------------

Orange 810	Pink 406	Red 306	Purple 408	Black 953
----------------------	--------------------	-------------------	----------------------	---------------------

Food Safety Compliant

All our uPVC cladding materials conform to all the latest regulations intended for food contact, please contact our sales team.

Fixing

Sheets can be fixed to the majority of dry substrates dependant on surface suitability. Using the adhesives in association with our range of profiles is all that is required to provide a complete hygienic installation.

Cutting

uPVC products are easily cut, the most suitable method is to use a jigsaw with a fine toothed blade. If you are using a circular saw, use a fine TCT blade.

Cleaning

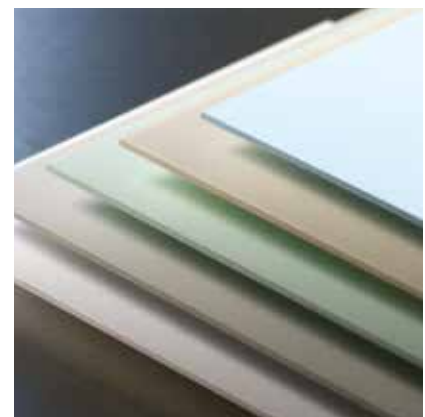

Using a soft cloth and diluted mild detergent is normally all that is required. Do not clean using any solution with a temperature exceeding 60°C. Do not use any abrasive cleaners, pads or wire wool as this will damage the surface.

Chemical Resistance

Resistant to virtually all commonly used chemicals, for further details please contact our sales team.

Fire Resistance

uPVC is a self-extinguishing fire retardant material. Our cladding materials are tested to meet the BS 476 part 6 and Class 1 at BS 476 part 7.

- Colour matched trims available
- Gloss finish
- Satin finish
- Antimicrobial panels on request
- Wide colour range
